

Project Statements

(COEP Technological University)

Team 4

Python:

Title: Library Management System

Objective: Develop a library management system to manage books, patrons, and borrowing activities.

Features:

1. Book Management: Add, view, update, and delete book records.
2. Patron Management: Add, view, update, and delete patron records.
3. Borrowing and Returning Books: Issue and return books, track due dates, and handle overdue books.

Machine Learning:

Title: ChatGPT reviews

Guidelines:

1. This dataset mainly consists of daily-updated user reviews and ratings for the ChatGPT Android App. It also contains data on the relevancy of these reviews and the dates they were posted.
2. Visualize the below given dataset.
3. Study why this dataset was created at first place.
4. Play around with ML techniques like linear regression and neural networks.
5. Report the results.
